MIOTI Tech & Business School

Subscribe to this group

MIOTI Tech & Business School is the first technological institute applied to business, which makes it a pioneer in the sector and a reference in specialized education in Data Science, Internet of Things and eBusiness.

Since its founding in 2017, it has received more than a dozen awards certifying its educational quality (Jean Baptiste Say, Educational Excellence Awards or European Excellence Awards) and is included in prestigious rankings such as the QS World University, in addition to being a member of the MIT Center for Entrepreneurship.

With a community of more than 60 professors who are experts in technology and work in top-level companies, MIOTI has trained more than 3,800 students through its more than 11 open programs and customized workshops, following its '100% practical, 0% postureo' methodology.

MIOTI has an exclusive collaboration agreement with the Martin Trust Center (MTC) of the Massachusetts Institute of Technology (MIT), the most prestigious technology university in the world, which allows its students to connect first-hand with world leaders and promote technological entrepreneurship in Spain.

With this alliance, MIOTI has access to MIT's teaching methodologies, recruitment and training programs, which benefit its students and drive the school's educational excellence.

More information at www.mioti.es and on its Facebook, Twitter, Instagram and Tik Tok profiles.
